

A member of the public has brought to our attention that the trampoline beds at WMRG have cut her Granddaughters feet due to metal fibres being exposed.

The trampolines have been closed off whilst we carried out further investigation.

As you can see from the attached pictures there are wires embedded in the fabric of the trampoline beds which has become exposed due to wear and tear.

Having spoken to Jupiter Play they have confirmed that the two trampoline beds – made of reinforced fabric belt are no longer under warranty, trampoline beds are classed as a moving wear part which have a guarantee of two years.

Therefore, both beds will need to be replaced:

**The jumping bed for the 1.5m trampoline is code E21898 and costs £730 ex vat and delivery per unit. Proposal for the expenditure to be taken from Open Spaces Reserve which is currently at £13976.84**
